DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 28-45 and 47-54, drawn to contiguous regions interconnected by local networks, classified in class 370, subclass 338.
- II. Claim 46, drawn to a Location Privacy Server (LPS) in the networks, classified in class 455, subclass 432.1.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the combination evidence claims 28-45 and 47-54 do not set forth the details of the subcombination in the invention II, which discloses a structure and operation of the Location Privacy Server (LPS). The subcombination LPS has separate utility such as the LPS in figures 1, 4 and 5. Thus, the inventions are distinct and restriction is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
